PUBLIC LAW (STATE LAW) SCIENCES

Economic space of Russia as a constitutional model of sustainable socio-economic development: issues of theory and legal regulation

© 2024 **Shchukina Tatyana Vladimirovna**

Doctor of Law, Associate Professor, leading researcher in the sector of Administrative Law and Administrative Procedure. Institute of State and Law of the Russian Academy of Sciences.

E-mail: shukina-tv@mail.ru

The relevance of the study is predetermined by the fact that the modern economic space of the Russian Federation is forming new approaches to understanding the economy and socio-economic development of Russia from several angles: a social phenomenon, a social process and an object of the material world in the context of social management. Existing interpretations of the theory of economic space and its legal regulation have certain discrepancies, but there is still a unity in both cases, which consists in the fragmentation of the legal consolidation of the term “socio-economic development”. Reducing the understanding of economic space from a legal point of view to the sustainability of economic development is an outdated approach to revealing the essence of this phenomenon. Economic space, along with other trends in economic sustainability enshrined in the Constitution of the Russian Federation, constitute a single whole of the new economic landscape of the Russian economy.

The subject of this article is a study of the concept and content of the terms “economic space”, “socio-economic development”, the classification and essence of growth points of the Russian economy and the features of their legal regulation in modern socio-economic and foreign policy conditions of the development of the Russian Federation. The topic of the article reflects the problem of legal regulation and the search for new approaches to the study of sustainable socio-economic development of Russia in the contours of the formation of a multipolar financial and economic system. And also the role of constitutional changes concerning economic development on the principles of political, social and economic solidarity.

The purpose of this article is to identify the basic meanings in understanding the economic space of Russia as a constitutional model of sustainable socio-economic development. The methodology of this work was made up of comparative, formal legal, and analytical methods. The results of the work are the formulation of the essence of the term economic space and sustainable socio-economic development in modern conditions.

Keywords: *economic space, sustainable socio-economic development, points of economic growth,*

economic sanctions.

REGIONAL AND SECTORAL ECONOMY

Regional experience of government stimulating increased efficiency of agricultural land use

© 2024 **Brick Anna Dmitrievna**

Candidate of Law, Associate Professor, Associate Professor, Department of Foreign Languages and Social and Humanitarian Disciplines. Don State Agrarian University, Persianovsky, Russia.

E-mail: brickad@mail.ru

The article analyzes the implementation of the powers of the constituent entities of the RF in the field of regulation of agricultural land use and the formation of a regime for the exploitation of agricultural land, and examines the main tools for regulating the regime of agricultural land use in some regions of the Russian Federation. The author substantiates administrative, organizational and economic proposals aimed at creating mechanisms for stimulating agricultural land users to introduce innovative formats and practices for land exploitation. The results of the article can be used in the formation of state agricultural policy at the federal and regional levels.

Keywords: *region, subject of the RF, economy, agriculture, agro-industrial complex, incentives, state, land resources.*

Smart contracts in printing business processes

© 2024 **Genin Kirill Yurievich**

General Director. PrintRobot company, Moscow.

E-mail: kg@printrobot.ru

In this scientific work, the author briefly analyzes the features of the use of smart contracts in the business processes of a modern printing house. To do this, the author examines the essence and main characteristics of smart contracts themselves, their differences from basic contracts. Further, the author focuses directly on the implementation of this tool in various processes of the printing house. In conclusion, the author examines the problems and prospects for using this tool, its current state and practical features. The object of this scientific research is various options for using smart contracts in business processes of a modern printing house. The purpose of this scientific research is a comprehensive, consistent analysis of the features of the use of smart contracts in the business processes of a modern printing house. Methods of this scientific research: formal legal, comparative analysis, dialectical, statistical, mathematical, generalization, specification, systematization, deduction, other methods of theoretical and practical levels of scientific knowledge. The scientific novelty of this scientific research lies in the preparation of a comprehensive study, the formation of the author's conclusions regarding the features of the use of smart contracts in the business processes of a modern printing house. This scientific article will be useful to theorists, practitioners, students and teaching staff of economic areas of training, as well as a wide range of readers interested in the problems and prospects of using smart contracts in the business processes of modern printing houses.

Keywords: *printing, printing business, printing house, production processes, economics, smart contracts, business processes, modeling, Digitalization.*

The evolution of views on sports management at the national level in the Russian Federation in the period from 2000 to 2015

© 2024 **Mikheeva Sofia Valeryevna**

Bachelor in Management science Department of Management of an Organisation. Lomonosov Moscow State University.

E-mail: mikkyso111@gmail.com

Since the establishment of the Union of Soviet Socialist Republics, sport has become an integral part of the State system and the important channel for broadcasting the achievements of the socialist system to the world. After the fall of the USSR views on the role of sports have transformed dramatically, however the importance of sports for the State did not change a lot. Sports agenda on the contrary became even more popular. This article is aimed at identifying factors influencing the separate elements of management systems in sports on the example of Russian rhythmic gymnastics. This article presents the main results of the historical-managerial research based on the approach of History of Managerial Thought. The research is conducted within such elements of the management system of Russian rhythmic gymnastics as Management Ideology and Content of Management Process.

Keywords: *history of managerial thought, sports management, rhythmic gymnastics, sports management, evolution of sports management, management initiatives, professional sports, Olympic sports, element of the management system, factors, classification.*

E-mail: urasov@sfnedu.ru

The article examines the basic principles of the mechanism of state (municipal) procurement in the Russian Federation, and carries out a comparative analysis of the advantages and disadvantages of such a format as state (municipal) procurement from a single supplier. The authors substantiate proposals for improving the procurement mechanism, namely, they proposed the development of calculation and analytical tools for assessing the reputation of a competition participant in the field of state (municipal) procurement, which allows one to mathematically interpret the reputation of a supplier of goods/services, carry out ranking and provide an advantage to participants in competitive procedures who have experience of stable, timely, proper fulfillment of obligations stipulated by the state (municipal) contract. The predicted socio-economic effect arising from the implementation of the proposed initiative is to increase the efficiency of bidding for the budgetary system of the RF due to the participation of reliable suppliers; reducing corruption risks associated with collusion between bidders and/or bribery of officials representing the interests of the state (municipal) customer. The results of the study can be used by state and municipal authorities.

Keywords: *economics, budget, state and municipal procurement, mechanism, legislation, regulation, effect.*

Digital national currency of the world. Stages of development

© 2024 **Osipova Valeria Sergeevna**

Postgraduate student. Moscow Financial and Industrial University Synergy, Moscow.

E-mail: studentaspirant@inbox.ru

In this scientific work, the author briefly analyzes the features of the historical development of digital national currency in various countries of the world. The author explores both more general issues of this topic, and more specific points concerning the experience of specific states of the world. For example, the work studied China, South Korea, and Russia in more detail; in a more abbreviated version, Australia, Germany, the USA, Belarus, Algeria, Bolivia and some other countries were studied. As part of the analysis, the author concludes that the entire set of countries in the world can be divided into 3 groups: states that are actively implementing digital currency, states that are at the stage of developing the implementation of digital currency, as well as states that deny any options for using digital currency. The object of this scientific research is the features of the historical development of digital national currency in various countries of the world. The purpose of this scientific research is a comprehensive, consistent analysis of the features of the historical development of digital national currency in different countries of the world. Methods of this scientific research: comparative analysis, dialectical, statistical, mathematical, generalization, concretization, systematization, deduction, other methods of theoretical and practical levels of scientific knowledge. The scientific novelty of this scientific research lies in the preparation of a comprehensive study, the formation of the author's conclusions regarding the features of the historical development of digital national currency in various countries of the world. This scientific article will be useful to theorists, practitioners, students and teaching staff, as well as a wide range of readers interested in the problems and prospects for the development of the modern digital economy in Russia and various countries of the world.

In this scientific work, the author briefly analyzes the features of the influence of tax education on long-term financial behavior. To do this, the author examines the influence of tax education on various categories of participants in tax legal relations, paying special attention to children and adolescents. The author writes about the direct positive or negative consequences of such influence, and notes specific practical tools with which you can increase the level of tax education. As a result, the author notes that in the future, tax education will be improved, mainly due to a more detailed introduction of ICT and AI mechanisms. The object of this scientific research is the peculiarities of the influence of tax education on long-term financial behavior. The purpose of this scientific research is a comprehensive, consistent analysis of the characteristics of the influence of tax education on long-term financial behavior. Methods of this scientific research: formal legal, comparative analysis, dialectical, statistical, mathematical, generalization, specification, systematization, deduction, other methods of theoretical and practical levels of scientific knowledge. The scientific novelty of this scientific research lies in the preparation of a comprehensive study, the formation of the author's conclusions regarding the features of the influence of tax education on long-term financial behavior. This scientific article will also be useful to theorists, practitioners, students and teaching staff, as well as a wide range of readers interested in current aspects of the influence of tax education on long-term financial behavior.
